github.com/princeradebe

Senior web developer and technical director with over ten years in ICT. At Hotfix Digital I lead the build, hosting and maintenance of websites and web applications for public sector and enterprise clients. Alongside client work I build my own products across web and iPhone with Next.js, Supabase and SwiftUI.

EXPERIENCE

Senior Web Developer & Technical Director, Hotfix Digital 2021 – present

- Design, build and maintain responsive websites and web applications, including WordPress builds, for public sector and enterprise clients.
- Run Linux (LAMP) hosting environments: DNS, SSL/TLS certificates, automated daily backups and uptime monitoring against 99.9% availability targets.
- Secure client sites with web application firewalls, malware detection and removal, patch management and vulnerability remediation.
- Design and administer MySQL databases behind web applications, document portals and online forms.
- Deliver SEO, performance and WCAG accessibility improvements; write disaster recovery plans and train client website administrators.

Software Test Engineer, Landis+Gyr 2019 – 2021

- Developed and tested software for test equipment, owning the quality and reliability of each release.
